

SIMPLY CLEVER

ŠKODA

ŠKODA Yeti

The secret to the **distinct design** of the new Yeti lies in the combination of a robust appearance with functional details. The characteristic **front grille** clearly evokes the ŠKODA brand while other elements of the front of the car lend the Yeti an original and striking expression. The main **headlights** sweep to the sides of the body. To the inside of them are **circular lights with integrated daytime running lights** and **foglights** on the 4x4 version. The Yeti can also be equipped with optional **Bi-Xenon headlights with rotary modules** and the 4x4 version with **front foglights and the corner function**.

Your driving will gain a whole new dimension thanks to the optional **electrically-adjustable panoramic roof** which allows you to create a large open space above the seats.

The **Yeti 4x4**, backed by the **latest generation Haldex clutch** as well as an optional **off-road mode**, can easily negotiate difficult terrain. The off-road mode has a number of functions such as the **Hill Descent Assistant** or **Start-up Assistant**, the adaptation of the **ABS, ASR** and **EDS** electronic systems to the driving conditions, and a more sensitive accelerator configuration.

You will discover state-of-the-art **technologies** in our new Yeti. It comes with a choice of radios, optional satellite navigation, Bluetooth® phone connectivity and a multi-function steering wheel. The high **technology** is further represented by the engines, some of which are available with front-wheel drive or four-wheel drive. The 1.2-litre 77kW engine is also available with an **automatic 7-speed DSG** (Direct Shift Gearbox).

Recommended gearshift function is displayed in the top right corner of the on-board computer display.

The optional **Columbus satellite navigation system** offers, amongst other things, an off-road navigation option. This feature enables you to record and save a route taken by the vehicle off the digitised road network, for example on unsealed roads.

The **front side airbags** protect the pelvis and chest of the driver and passenger in the event of a side collision. The **height-adjustable WOKS front headrests** are designed to protect the spine in case of a rear impact.

While the **driver airbag** is hidden in the steering wheel, the **passenger airbag** is located in the dashboard.

The optional **alarm** with interior monitoring, horn with back-up power and inclination sensor play an important role in the security of the car.

The **driver's knee airbag** prevents contact with the lower part of the dashboard in the event of a collision.

The **third headrest in the rear** is height adjustable and increases the safety of the passenger in the middle seat.

The **curtain airbags**, which create a wall along the side windows when activated, protect passengers' heads in the event of collision.

The **Boarding Spots**, designed to illuminate the entry areas, are integrated into the wing mirrors and enable you to avoid puddles when leaving the car in the dark.

VarioFlex is our innovative rear seating system – three separate rear seats, which can be folded or removed independently of each other.

Storage compartments in the sides of the boot and **sliding hooks** on the 4x4 version allow shopping to stay safe and upright.

The **luggage nets** help keep items in place.

The **foldable table** in the rear seat backrest.

Sunglasses compartment is located in the roof panel (Yeti 4x4 only).

Centre console with a drinks holder, storage compartment and pen holder.

A useful open **storage compartment** is found on the dashboard (closed on the 4x4).

1.0-litre bottle holder in the front door compartments.

Silver roof rails are standard on the 4x4.

If you have high expectations of **comfort**, the Yeti will fulfil them. Discover unexpected **spaciousness** as well as exceptional **practicality** as you intuitively find all controls exactly where you'd expect them.

Optional **privacy glass** from the B-pillar back helps cut sun glare for passengers.

Climatronic dual-zone air conditioning with electronic regulation, pollen filter and automatic air circulation (standard on 4x4).

Cruise control is standard across the range.

Optional **Park Assist** instructions are shown on the **multi-function** display.

The equipment of the **entry-level Yeti** completely reflect the character of the car. It offers a level of comfort which exceeds the standard for the compact SUV class, while staying attractive with its simple elegance. The Reflex interior with fabric upholstery is available in black. The dashboard, in black/black, is lined with the Graphit décor. The standard equipment for the entry-level Yeti also includes height-adjustable driver's seat, electrically-adjustable external mirrors and front and rear windows, 1.0-litre bottle holders in the front door compartments, a centre console with a drinks holder, a storage compartment and a pen holder, the VarioFlex rear seating system and Nevis 7.0J x 16" alloy wheels.

The **Yeti 4x4** equipment version is the perfect choice for those who desire a sports style with a high level of comfort and safety. The Spirit interior with fabric upholstery is available in black/silver, while the dashboard in black/black, is lined with the Quartz décor. The standard equipment for the 4x4 includes chrome interior door handles, a steering wheel with a chrome strip, onboard computer, a third headrest in the rear, a foldable table in the rear seat backrest, a fixing system with sliding hooks in the luggage compartment and Spitzberg 7.0J x 17" alloy wheels. By special request, the 4x4 version may also be ordered with the exclusive Lynx (leather/artificial leather) interior.

ŠKODA Yeti with front-wheel drive and 77TSI petrol engine.

ŠKODA Yeti with four-wheel drive, latest generation Haldex clutch and 103TDI diesel engine or 112TSI petrol engine.

The **roof transportation systems** will be appreciated when carrying various sports equipment. A genuine ŠKODA box with 380-litre capacity, is also available.

To get a full overview of our range of accessories products, ask any authorised ŠKODA partner for our special accessories catalogue.

A **towing device** for a trailer of up to 1,600kg.

Plastic boot tray with an increased 15cm edge and a Yeti inscription.

General information

OWNING A ŠKODA

ŠKODA New Vehicle Warranty

Every new ŠKODA passenger vehicle is covered by a three-year unlimited kilometre manufacturer's warranty, which includes ŠKODA Assist (24-hour roadside assistance). Every new ŠKODA vehicle is also covered by a three-year paintwork and 12-year anti-corrosion perforation warranty.

ŠKODA Assist - 24-Hour roadside assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original ŠKODA warranty period. You will receive help in the event of a breakdown or accident and, if required, your vehicle will be mobilised or transported to an Authorised ŠKODA Workshop. As a ŠKODA owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100km away from home.

ŠKODA Extended Warranty

To give you added peace of mind and the assurance of added security, you have the option to extend the factory warranty to suit your ownership cycle. If your ŠKODA was purchased new by you, we can offer you a 36 month/60,000km extension on your already existing ŠKODA manufacturer's warranty. Alternatively, if your vehicle is already outside the ŠKODA manufacturer's warranty period we can also offer you an extension of your factory warranty. Have the assurance that your ŠKODA remains a ŠKODA. For further information regarding warranty and extending your vehicle's factory warranty, please consult your local ŠKODA dealer, refer to your owner's handbook or visit www.skoda.com.au

ŠKODA Service

Your Authorised ŠKODA Service Centre is part of ŠKODA's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised ŠKODA Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and ŠKODA Genuine Parts®. An Authorised ŠKODA Service Centre undertakes work in accordance with factory specified guidelines and maintenance schedules.

ŠKODA Genuine Parts®

ŠKODA Genuine Parts® are designed for your vehicle and approved by ŠKODA, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, ŠKODA recommends the use of ŠKODA Genuine Parts®. ŠKODA Authorised Dealers offer a two-year unlimited kilometre warranty on Genuine Parts from the date of purchase.

ŠKODA Finance*

Buying, borrowing or leasing, ŠKODA Finance will certainly make you think differently about financing and insuring your new ŠKODA. Committed to meeting the needs of ŠKODA drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are personalised to suit your individual requirements. You design your plan so that it meets your budgeting needs and rest assured that there will be no surprises along the way. Speak to your local participating Authorised ŠKODA Dealer today to put together a financial solution that best suits your lifestyle.

GLOSSARY

Anti-lock Braking System (ABS)

When braking, sensors in each wheel measure the road speed. If one or more wheels start to lock, the ABS reduces brake pressure to those wheels. This prevents the wheels from locking during heavy or emergency braking and allows you to continue to steer the vehicle.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the front wheels from spinning under acceleration. When a difference in driving wheel speed is detected (e.g. due to differences in road surfaces), the system automatically reduces engine torque accordingly.

Electronic Brake-pressure Distribution (EBD)

This sophisticated system provides an electronic means of regulating the ratio of front to rear brake pressure. The system automatically varies the settings according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Stability Control (ESC)

The ESP is made up of the ABS and ASR traction control systems. Simply put, it helps ensure that the vehicle goes where you steer it – even in extreme driving conditions. By constantly comparing the actual movement of the vehicle with pre-determined values, ESC will apply the brakes to individual wheels and automatically adjust the engine's power output to correct a problem the very moment it arises.

Brake Assist

Brake Assist aids the driver during emergency braking by automatically increasing the brake pressure to a level exceeding the locking limit. Then, the ABS is quickly brought into the operating range, thereby enabling maximum vehicle deceleration.

* ŠKODA Finance, a trading name of Volkswagen Financial Services Australia Pty Ltd ABN 20 097 071 460

One of the most important goals of ŠKODA is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our ŠKODA cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cathaphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of ŠKODA meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by ŠKODA adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, ŠKODA cars meet technical, safety, quality and environmental requirements. ŠKODA contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses ŠKODA Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

ŠKODA is distributed by Volkswagen Group Australia Pty Limited trading as ŠKODA Australia, 24 Muir Road, Chullora, NSW 2190. ABN 14 093 117 876. Specifications are as planned at March 2012, for Model Year 2012 and are subject to change without notice or obligation. Cars and accessories shown may not depict Australian specifications. Fuel consumption figures according to Australian Design Rules (ADR) 81/02. All ŠKODA approved parts and accessories are warranted for 2 years/unlimited kilometres.
